Important Health Plan Benefit Update for 2019

<email copy>

Why pay more when you don't have to?

If you subscribe to one of our Blue Cross Blue Shield of Massachusetts plans, you can save money on your outpatient lab tests and imaging services. Beginning in 2019, you'll pay less out-of-pocket when you choose non-hospital providers for your lab work (like blood and urine tests) and imaging (like MRIs, CT scans, and x-rays). Non-hospital providers include independent clinical labs, such as Quest Diagnostics and LabCorp and freestanding imaging centers, such as Shields MRI and Premier Diagnostics. Get the same service, just at a different location.
